PROJECTS

☐ Cloud Data Security(Android Platform Solution)

The project is focused on the cloud data security and privacy of data during cloud data transfer. It emphasizes on the theft issues possible during data transfer and stored files on the various cloud platforms. This project will provide solution to the various problems mentioned below:

- I. data theft when data being stored on cloud
- II. data loss or theft during the transmission of data

☐ Virtual Team Hiring Website (PHP Website)

This project aims at providing a platform to the freelancers, jobseekers and companies to interact with each other. This project eases the tedious task of jobseekers to find the right job and of the companies to find the right candidates for their respective projects and start-ups. This project aids the start-ups in the cumbersome process of hiring a virtual team. They can simply select the suitable candidates and connect with them through the portal we provide. Any jobseeker can choose the company of his/her choice from our large database.
